Dear Partners,

As you know the World and our country Saudi Arabia has been badly hit in the past few months by the epidemic of COVID 19. These are difficult times both on medical and personal safety point of view as well as on the business impacts for companies.

In Legrand our top priority is the health and safety of our employees and well as our partners'. Consequently we took very early, both at global and local level, number of measures to prevent the disease from spreading: travel restrictions, sanitizations measures, reorganization of workspaces as well as the wide usage of work from home and all measures recommended by Government and Health authorities have been swiftly implemented to prevent the disease to spread any further.

We are also focused on limiting the impact on the business with continuity plans to keep on being able to communicate to you and delivering the products that you need. Despite the difficulties, you can still be in touch with your Legrand local representatives as well as your customer service contact which are available by email as well as by phone.

As the situation is very volatile and keeps on changing on regular basis, we will keep on adapting to the local regulations and recommendations and informing you about the latest developments.

In the meantime, I wish you and your loved ones to stay in good health.

Best regards

Olivier Le Floc'h
General Manager Legrand SA.
